1. Introduction

1.1. Overview

This report describes the methodological aspects of the ninth Australian Social Cohesion Survey funded by the Scanlon Foundation and undertaken by a consortium involving the Scanlon Foundation, Monash University, the Australian Multicultural Foundation and the Social Research Centre.

This report provides:

- details of the survey procedures
- a consolidated record of assorted technical information for the project.

The report is structured as follows:

- Section 2 provides details of the sampling process and call procedures
- Section 3 provides a summary of the questionnaire design and testing process
- Section 4 summarises interviewer training and quality control procedures
- Section 5 reviews the National call results and response rate
- Section 6 reviews the Local call results and response rate
- Section 7 provides a brief summary of data preparation procedures.

More detailed reference information is appended.

1.2. Project background

The Social Cohesion Survey forms part of the Scanlon Foundation Social Cohesion Research Program (SCRP) which commenced in 2007 under the direction of the Monash Institute for the Study of Global Movements (MISGM) and the Australian Multicultural Foundation (AMF). A key element of the SCRP was the conduct of the landmark Australian Social Cohesion Surveys in 2007, 2009, 2010, 2011, 2012, 2013, 2014, 2015 and now 2016.

The aims of this survey are:

- to look at the Australian community's attitudes towards various aspects of social cohesion
- to assess changes in these attitudes over time.

1.3. Survey overview

In 2016 both a National Level Survey and a Local Level Survey was conducted. Data collection for both surveys was by Computer Assisted Telephone Interviewing (CATI).

As with the previous surveys, the in-scope population was persons aged 18 years and over who were residents of private households in Australia.

The 2016 National Survey involved 1,500 adults (aged 18 years and over), stratified by State/Territory and capital city / non-capital city. This report discusses the methodology of the National survey only.

A dual-frame sample methodology was used involving two separate sample frames; one drawn from randomly generated (RDD) landline telephone numbers and a second drawn from randomly generated

mobile phone numbers. Used for the first time in 2013, this approach meant the Social Cohesion Survey was able to include the views of the estimated 29%[1] of adults who live in households without a landline telephone connection on which to make and receive calls (the so-called mobile phone-only population). The sample blend used for the main survey of 1,500 interviews was 60.0% landline numbers and 40.0% mobile phone numbers. Overall, 256 (17%) interviews were obtained with members of the mobile phone-only population – enough to draw statistically meaningful inferences about this group.

As in previous years:

- Approach letters introducing the survey were mailed to all households where randomly generated landline (fixed line) telephone numbers could be matched to a confirmed address.
- For the landline sample, where more than one eligible respondent lived in a household, the "next birthday" method of respondent selection was employed.

This issue was not relevant for the mobile phone sample where interviews were conducted with the in-scope phone answerer.

- Various strategies were adopted to maximise the survey response rate including:
  - repeated call backs to establish contact
  - the use of the Social Research Centre's helpdesk (1800 023 040)
  - interviewing in languages other than English (LOTE).

A letter could be requested by any sample member who would like more information regarding the survey in an attempt to gain participation in the survey. We had no requests for a letter.

Table 1 provides a summary of key statistics.

- The response rate for the 2016 National Survey was 50.4%, comparable to previous years although slightly under.
- There were a few revisions applied to the 2015 questionnaire for the 2016 iteration of the survey. These changes saw an increase of two minutes in interview length from 2015 to 2016 (see Section 3 and Appendix 2 for details). There was minimal difference between the average length of interviews conducted with respondents using a landline telephone (18.7 minutes) and those conducted with respondents using a mobile phone (18.6 minutes).

Table 1 Survey overview

	2007	2009	2010	2011	2012	2013	2014	2015	2016
Interviews completed	2,012	2,019	2,021	2,001	2,000	1,200	1,526	1,501	1,500

2. Sample Design & Survey Procedures

2.1. Sample design

To accommodate the dual-frame sampling approach, the 2016 survey used a combination of geographically stratified random sampling (as in previous years) and, given the lack of geographic information available for the mobile sample, an additional mobile phone stratum that was not geographically stratified.

Final allocations to geographic strata were based on the postcode/location information provided by respondents. The final distribution of interviews across the 15 geographic strata is provided in Table 3 below.

In accordance with the sample design, the final distribution of interviews from the landline sample was proportional to the Capital City/Rest of State population in each state. This could not be controlled for in the mobile sample frame; nevertheless the final distribution of the 600 interviews obtained from this frame is similar to previous years

The sample was designed so that interviews were distributed between states disproportionately to the actual population; this was done so that sufficiently large samples were available to support analysis at the state level for all states/territories except Tasmania, Northern Territory and the ACT. Part of the task of the data weighting procedures discussed in Section 7.2 was to adjust for this disproportionate sample design.

Table 3 Survey geographic distribution of final achieved sample by sample frame

Geographic strata	Sample Frame		
	Landline (n)	Mobile (n)	Total Interviews (n)
Sydney	96	96	192
Rest of NSW	54	74	128
Melbourne	112	120	232
Rest of Vic	38	37	75
Brisbane	62	47	109
Rest of Qld	88	70	158
Adelaide	109	38	147
Rest of SA	41	10	51
Perth	113	53	166
Rest of WA	37	23	60
Hobart	22	7	29
Rest of Tasmania	28	7	35
Darwin	32	6	38
Rest of NT	17	3	20
ACT	51	9	60
Total	**900**	**600**	**1500**

The blend of interviews from the landline and mobile phone sample frames (n=900 and n=600 respectively) was implemented with the aim of obtaining at least 200 interviews with people from "mobile phone only" households (in fact, 256 interviews with such respondents were obtained in the final sample).

2.2. Sample generation

The commercial sample provider, SamplePages, provided both the landline and mobile phone samples.

- The Random Digit Dialling (RDD) landline sample was generated via the same approach that has been used since 2010. As in previous surveys, each phone number generated was assigned a "best estimate" postcode, based on exchange district and service zone units, which was then used for a priori allocation of numbers to geographic strata
- The sample for the mobile phone component of the survey was randomly generated from within number ranges provided by the Australian Communications and Media Authority (ACMA) that were known to contain active mobile phone numbers. No geographic or address information was provided with these numbers so primary approach letters could not be sent to any members of the mobile phone sample frame.

2.3. Primary Approach Letter

The phone number records making up the landline sample frame for the 2016 National survey were matched against the current address information provided by Sensis' *Macromatch* service. A primary approach letter was sent to each record for which an address could be established; of the 6,206 landline telephone records used, an up-to-date address listing was obtained for 35.3 percent (n=2,189) with a primary approach letter sent to each one.

The approach letter, on Monash University letterhead and addressed to "The Householder", was the same version as used in previous surveys (see Appendix 5 for a copy of the 2016 letter). The main body of the letter was in English, with translated summaries on the reverse side in Arabic, Turkish, simplified Chinese and Vietnamese. These languages were chosen as they are the most commonly spoken languages nationally.

The approach letter introduced the survey, encouraged participation and provided sample members with telephone numbers, email addresses and website details to assist with the resolution of any queries they might have.

As part of the data collection procedures, arrangements were put in place to send (additional) approach letters to sample members upon request. In such cases a letter was dispatched to the household the next day and an appointment made to call back to the household 5 days later; no requests for an approach letter were made during fieldwork for the 2016 survey.

When return-to-sender approach letters were received no action was taken to remove the telephone number associated with that address from the sample. The reason all telephone numbers associated with return-to-sender approach letters were still called is that the phone number may still be active and should be called regardless of whether or not the approach letter reached the intended household.

2.4. Scope status and respondent selection

The in-scope population for the survey was the non-institutionalised population of Australia aged 18 years or over. As such it excluded residents of institutional premises (prisons, nursing homes, etc) and military bases. Other exclusions that also applied included:

- persons who indicated that they were incapable of undertaking the interview due to a physical or health condition (including too old / frail)
- persons apparently under the influence of drugs or alcohol
- non-English speaking persons outside of the LOTE communities targeted for this survey (see Section 2.6)
- households with no person aged 18 years or over in residence.

For the landline sample, the "next birthday" method was used to select the person 18 years or older in the household to be interviewed where more than one eligible person was resident. No substitution of individuals within households was allowed. For the mobile phone sample, the person eligible to be interviewed was the in-scope phone answerer.

2.5. Call procedures

A 15-call protocol was used for the study, whereby up to six attempts were made to establish contact with the selected household or person, and on making contact, up to nine more attempts were made to achieve an interview with the selected respondent.

This call regime was adopted to improve the representativeness of the achieved sample. Previous experience suggested that the representation of groups such as males and working persons is improved by using an extended call cycle of this type.

Initial contact attempts were made between 4.30 pm and 8.30 pm on weekdays and between 11.00 am and 5.00 pm on Saturdays and Sundays. Appointments were made for any suitable time within the hours of operation of the call centre.

2.6. Procedures for interviewing in languages other than English

Non-English language interviewing was conducted in six of the most commonly spoken community languages nationally: Vietnamese, Chinese (Cantonese and Mandarin), Italian, Greek and Arabic.

Where the preferred language of interview of the selected sample member was identified as one of the above, these records were initially stockpiled until a reasonable workload for a bi-lingual interviewer was reached.

Where the preferred language could not be immediately identified, a call-back was made given the possibility that another household member might be available to assist with the request for interview. Where the preferred language was not one of the six target languages, the record was assigned the code "language difficulty, no follow up" and no further call attempts were made.

Bi-lingual interviewers annotated their own hard copy questionnaires (one for each target language) with key words and concepts translated. These interviewers then read the questions from their hard copy version of the questionnaire and recorded answers directly into the English language CATI script

as normal. A total of 31 interviews were conducted in a language other than English (10 Mandarin, 10 Vietnamese, 7 Cantonese, 3 Greek and 1 Arabic).

2.7. Leaving messages on answering machines

A pre-scripted message was left on answering machines if there had been no previous 'personal' contact made with a household. Refer questionnaire at Appendix 3 for the full message script.

An appointment to call back was scheduled for six days later the first time such a message was left and for five days hence on the second such occasion. Messages were not left on answering machines in any other circumstances.

2.8. Pre-approach text messaging

For the first time, mobile phone numbers selected to take part in the National Social Cohesion study were sent a pre-approach text message informing them that they were going to be contacted for the research and offering them a way to opt out. The content of the message was:

> *Hi, The Social Research Centre will be calling in the next few days to ask for your opinion on some of the big issues facing Australians today, as part of an annual study conducted for Monash University. Reply: 1 if aged 18+ and can take part, Reply: 2 to optout.*

Of the 5,270 mobile numbers that were sent a text message, 175 respondents replied '1' to opt in and 1,210 respondents opted out. The respondents who opted out of the survey were not dialled in CATI and were excluded from response rate calculations. In future surveys', a discussion about the overall effectiveness and efficiencies gained from sending a pre-approach text message should be explored before committing to this procedure again.

There were no pre-approach text messages sent for the Local survey.

2.9. 1800 number operation

Monash University provided a telephone number that respondents could call to verify the survey and find out additional information about why it was being conducted. The Social Research Centre operated a 1800 number throughout the study period to handle any questions about participation in the survey (setting an appointment time, requesting an interpreter, refusing to participate etc.). In total 129 calls were made to the Social Research Centre with 104 calls for the National survey and 25 calls for the Local survey. The majority of calls were to make an appointment (65% National survey and 52% Local survey) or to refuse participation (16% National survey, 32% Local survey).

2.10. Sundry response maximisation procedures

In addition to providing a 1800 number, offering to send an introductory letter and arranging for interviews in the agreed languages, other response maximisation procedures that applied to the project included:

- referring sample members to the Monash University number on an "as required" basis
- ensuring appropriately trained interviewers worked on the survey (see also Section 4.2).

3. Questionnaire Design

3.1. Questionnaire overview

The questionnaire for the Social Cohesion 2016 survey underwent some changes with both additions and deletions to the 2015 questionnaire with the majority of the survey items remaining the same.

The additions included questions which looked at trust towards certain multicultural, ethnic and religious groups, as well as attitudes towards the Australian Government's policy on the Syria crisis and proposed intake of Syrian refugees. Questions about trust towards certain institutions and politics were removed. A summary of these changes can be found in Appendix 2.

3.2. Questionnaire pilot testing

The 2016 survey did not have a formal pilot but instead had a "soft launch" where a small interviewing team completed 28 interviews on the first night of the fieldwork period. This enabled an assessment to be made of the questionnaire changes in terms of their impact on flow and delivery.

During this phase, standard operational testing procedures were used to ensure the CATI script accurately reflected the agreed "hard copy" questionnaire.

There was some feedback from the Operations team surrounding one of the new questions which prompted a revision to the code frame and lead in to improve the comprehension of the question as intended. This change did not fundamentally change the data collected and so the data from the soft launch was retained. The final 2016 questionnaire is provided at Appendix 3.

4. Data Collection & Quality Control

4.1. Ethical considerations

The questionnaire and survey methodology were both approved by the Monash University ethics board. Other ethical considerations for the Social Cohesion Survey included:

- ensuring informed consent,
- ensuring the voluntary nature of participation was clearly understood,
- protecting the privacy and confidentiality of respondent information,
- ensuring that mobile phone respondents are safe to take the call and have not increased their risk of accident by answering the phone while driving or in a hazardous environment.

Safeguards regarding the above were covered by the Social Research Centre's contract with Monash University and by the appropriate privacy laws. In addition, the Social Research Centre is bound to adhere to AMSRO Privacy Principles and the AMSRS Code of Professional Behaviour.

4.2. Field team briefing

All interviewers selected to work on the Social Cohesion Survey attended a comprehensive briefing session covering the project background, objectives and procedures; all aspects of administering the survey questionnaire, including specific data quality issues; an overview of respondent liaison issues, including refusal avoidance techniques; and practice interviewing.

The briefing sessions were delivered by the Social Research Centre project manager and supervisory staff. As the survey was identical with the exception of the sample composition and pre-approach, interviewers were briefed on both projects (the National and Local survey) so they could move between the two as needed. In total 44 interviewers were briefed to work on the 2016 survey.

The interviewer briefing notes are provided at Appendix 4.

Additional briefing procedures specific to LOTE interviewing covered:

- establishing scope status
- tone and delivery
- reviewing the questionnaire for instances where word-for-word translations may lose their exact meaning or context.

4.3. Fieldwork quality control procedures

The in-field quality monitoring techniques applied to this project included:

- validation of interviews in accordance with ISO Standard 20252
- maintenance of an "interviewer handout" document addressing respondent liaison issues and tips for refusal avoidance
- examination of verbatim responses to "other specify" questions
- monitoring (listening in) by departmental supervisors.

5. Call Results & Analysis of Response

5.1. Call results

A total of 10,456 sample records (6,206 landline numbers and 4,250 mobile numbers) were initiated to achieve the final 1,500 completed surveys. A total of 38,178 calls were placed to these sample records equating to an average of 3.7 calls per record and one completed interview for every 25.6 calls.

Table 2 shows the final call results for the survey. As can be seen, for the dual-frame sample (that is, the combined call results from the landline and mobile phone sample frames) an interview was achieved from 14.3 percent of the 10,456 numbers to which calls were initiated for this survey.

Of the numbers initiated, 16.4 percent were unusable; 50.7 percent were unresolved at the end of the call cycle (non-contacts or unresolved appointments); and 4.1 percent were identified as being out of scope. Refusals (all types) were encountered at 14.4 percent of the numbers to which calls were initiated.

Table 2 Final call results

	Dual-Frame		Landline Frame		Mobile Frame	
	n	%	n	%	n	%
Total numbers initiated	**10,456**	**100**	**6,206**	**100**	**4,250**	**100**
Unusable numbers						
Telstra message, number disconnected	713	6.8	307	4.9	406	9.6

No contact / unresolved in survey period						
Engaged	38	0.4	19	0.3	19	0.4
Answering machine	1,909	18.3	950	15.3	959	22.6
No answer	1,203	11.5	523	8.4	680	16.0
Appointments	334	3.2	173	2.8	161	3.8
Maximum non-contact attempts made	1816	17.4	1248	20.1	568	13.4
Subtotal no contact / unresolved	*5,300*	*50.7*	*2,913*	*46.9*	*2,387*	*56.2*
Out of scope						
Claims to have done survey	4	0.0	3	0.0	1	0.0
Selected respondent away for duration	68	0.7	46	0.7	22	0.5
LOTE – No language follow up	104	1.0	61	1.0	43	1.0
Too old / ill health / unable to do survey	168	1.6	148	2.4	20	0.5
Out of scope (no-one 18 plus in hhold/on mobile)	84	0.8	9	0.1	75	1.8
Subtotal out of scope	*428*	*4.1*	*267*	*4.3*	*161*	*3.8*
Contacts						
Interviews	1,500	14.3	900	14.5	600	14.1
Midway termination	63	0.6	36	0.6	27	0.6
Household refusal	688	6.6	688	11.1	-	-
Respondent refusal	700	6.7	255	4.1	445	10.5

	Dual-Frame		Landline Frame		Mobile Frame	
	n	%	n	%	n	%
Total numbers initiated	**10,456**	**100**	**6,206**	**100**	**4,250**	**100**
Remove number from list	28	0.3	20	0.3	8	0.2
Named respondent not known	13	0.1	8	0.1	5	0.1
Refused screening question	23	0.2	-	-	23	0.5
Subtotal in-scope contacts	*2,992*	*28.6*	*1,907*	*30.7*	*1,108*	*26.1*

Reflecting on the same trend as in previous years, the differences between landline and mobile call outcomes continue to be quite distinct. However across all of the points listed below the margin of difference between two has decreased from 2015. Of difference again this year, the landline frame had:

- A higher proportion of unusable numbers (18.0% versus 14.0% for the mobile frame), particularly non-residential phone numbers (7.9% versus 2.2% for mobiles).
- A considerably lower proportion of 'answering machines' (15.3% versus 22.6% of mobiles) and 'no answer' (8.4% versus 16.0% of mobiles), and consequently a lower proportion of 'non-contact/unresolved' call outcomes (46.9% versus 56.2%).

Finally, as shown in Table 3, as a proportion of all in-scope contacts, the total refusal rates were slightly higher within the landline sample frame than in the mobile sample frame (52.4% and 45.4% respectively).

Table 3 Final call results for in-scope contacts

	Dual-Frame		Landline Frame		Mobile Frame	
	n	%	n	%	n	%
Total in-scope contacts	2992	100	1907	100	1108	100
Contacts						
Interviews	1,500	50.1	900	47.2	600	54.2
Midway termination	63	2.1	36	1.9	27	2.4
Household refusal	688	23.0	688	36.1	-	-
Respondent refusal	700	23.4	255	13.4	445	40.2
Remove number from list	28	0.9	20	1.0	8	0.7
Named respondent not known	13	0.4	8	0.4	5	0.5
Refused screening question	23	0.8	-	-	23	2.1

5.2. Response rate

For the purposes of this report, and to facilitate comparisons with previous Social Cohesion surveys, the response rate is defined as follows (AAPOR Cooperation rate 1[2]):

Response Rate = (number of interviews) ÷ (number of interviews + refusals).

Using this formula, the final overall response rate for the 2016 National survey was 50.0 percent; this was slightly under the 2015 survey response rates. In looking the sample frames separately, the mobile sample had a response rate of 54.4 percent and the landline sample had a response rate of 47.4 percent.

The pre-approach text message will have contributed to the mobile sample achieving a higher response rate than the landline sample. Without the pre-approach text message strong opponents of the survey would normally have refused participation upon speaking with an interviewer. Instead, they had the option to refuse via text message before calling commenced. As the mobile opt outs via text message were not included in the response rate calculations, this could be a contributing factor for that difference.

Table 4 shows the efficiency of the lettered sample compared to the non-lettered sample with 23.7 percent of households who received the letter going on to complete the interview compared to nine percent for those households who did not. Lettered sample members also appeared more likely to refuse participation compared to those who did not receive the letter (25.4% of lettered versus 11.3% of unlettered). Generally performance between the states for the landline sample was quite even with the exception of the Northern Territory with a higher unusable sample (21.1%) and non-contacts (55.7%) along with a lower uptake of the survey (8.1%) when compared to the average (15.5% unusable, 48.4% non-contact, 14.3% interviews).

Table 4 Response rates

	Base	Interview	Refusal	Unresolved contact	Other contacts	Non-contact	Unusable
	(n)	%	%	%	%	%	%

ACT	335	14.9	13.4	0.3	5.4	46.9	19.1

5.3. Achieved sample profile

Table 7 compares the achieved sample profile (using unweighted data) with that of the adult Australian population (using Australian Bureau of Statistics 2014 Estimated Residential Population counts for total population estimates of age and gender groupings and 2011 Census data to provide population proportions for educational attainment and country of birth).

As with previous years, it can be seen that the final sample exhibits a skew towards older people, females and tertiary educated respondents. Overall however, the results are consistent with those obtained in other similar surveys conducted by the Social Research Centre and all of these factors were taken into account in the weighting procedure (see Section 7.2).

Table 5 National sample profile

	Achieved sample profile (Unweighted)	Australian population 18 years plus
Total (n)	**1,500**	**18,441,317**
Age group (%)		
18-34 years	16.3	31.4
35-44 years	12.8	17.5
45-54 years	16.6	16.9
55-64 years	21.0	14.8
65 years or more	32.7	19.4
Gender (%)		
Male	47.3	49.3
Female	52.7	50.7
Educational Attainment (%)		
University (Bachelor or Postgraduate degree)	38.5	19.8
Have not completed a university degree	52.7	80.2
Australian / Overseas born (%)		
Born in Australia	70.6	64.6
Born overseas	29.0	35.4

5.3.1. Landline and Mobile Sample Frames

Table 8 presents the achieved sample profile of the total sample (ie: the dual-frame sample) and also shows demographic information for the landline and mobile phone sample frames; major differences between these two groups are denoted by the presence of an arrow (↑ or ↓) in the "mobile frame" column. The table also presents demographic information for the "mobile phone only" respondents (*n=256*).

It is evident from Table 8 that, compared to members of the landline sample frame, respondents from the mobile phone sample frame had:

- A higher proportion of younger people (31.7% were aged under 35 years compared with 6.1% of the landline sample); males (57.7% versus 40.3%); employed persons (66.2% versus 41.1%) and students (5.0% versus 2.1%); and people who did not hold Australian citizenship (11.7% versus 4.6%).
- By contrast, the mobile frame sample exhibited a lower proportion of people aged 65 years or more; females; retirees; and Australian citizens.

Most of these differences are also present amongst the mobile phone only sample. That is, within this group there is a higher proportion of younger people, male, employed persons, unemployed persons, students and people who do not hold Australian citizenship.

As in previous waves, it is evident from these figures that the use of a mobile phone sample frame has improved the representativeness of the final sample in a number of areas.

Table 6 Comparative sample profile – landline and mobile sample frames (unweighted data)

	Dual-Frame	Landline Frame	Mobile Frame	Mobile Only Sample
Total (n)	**1,500**	**900**	**600**	**256**
	%	**%**	**%**	**%**
Age group				
18-34 years	16.3	6.1	31.7↑	47.3↑
35-44 years	12.8	10.9	15.7↑	15.2
45-54 years	16.6	16.7	16.5	17.6
55-64 years	21	21.6	20.2	11.7↓
65 years or more	32.7	44	15.8↓	7.8↓
Gender				
Male	47.3	40.3	57.7↑	59↑
Female	52.7	59.7	42.3↓	41↓
Educational Attainment				
University (Bachelor or Post graduate degree)	38.5	36.6	41.5	40.2
Have not completed a university degree	61.5	63.4	58.5	59.8
Australian / Overseas born				
Australian born	70.6	72.3	68.0	66.4
Overseas born	29	27.2	31.7	32.8
Employment status				
Employed	51.1	41.1	66.2↑	70.3↑
Unemployed	4.9	4.2	5.8	8.6↑

	Dual-Frame	Landline Frame	Mobile Frame	Mobile Only Sample
Total (n)	**1,500**	**900**	**600**	**256**
	%	**%**	**%**	**%**
Retired	33.7	44.9	17.0	7.8
Student	3.3	2.1	5.0↑	6.2↑
Home duties	3.4	4.1	2.3	3.1
Other	3.3	3.3	3.3	3.5
Australian citizenship				
Australian citizen	92.4	95.2	88.2↓	81.6↓
Not an Australian citizen	7.4	4.6	11.7↑	18.0↑

Result is significantly above (↑) or below (↓) the result for the landline sample frame, p<0.05.

5.4. Reasons for refusal

Reasons for refusal were captured, where possible, from either the phone answerer (household refusal) or the selected sample member (respondent refusal).

As can be seen from Table 9, of those cases for which a reason for refusal was recorded, the most common reasons given were; “not interested” (42.1%), “no comment / just hung up” (28.1%) and “too busy” (6.5%).

Results were similar for mobile and landline samples except that those from the mobile frame (not unexpectedly) were slightly more likely to say they were ‘too busy’ (9.4% versus 5.1% of those from the landline sample frame).

Table 7 Reasons for refusal

	Total Dual-Frame	Landline Frame	Mobile Frame
Total (n)	**1,515**	**900**	**1,007**
	%	**%**	**%**
Not interested	42.1	43.2	40.0
No comment/just hung up	28.1	28.9	26.6
Too busy	6.5	5.1	9.4
Never do surveys	3.2	4.0	1.6
Too personal/intrusive	1.2	1.1	1.4
Don't believe surveys are confidential/privacy concerns	1.1	0.9	1.6
Silent number	1.1	1.3	0.8
15 minutes is too long	1.1	1.1	1.2
Get too many calls for surveys/telemarketing	1.0	1.2	0.6
Don't trust surveys	0.9	0.8	1.0
Don't like subject matter	0.7	0.8	0.6
Letter put me off	0.3	0.3	0.2
Other (SPECIFY)	1.7	1.9	1.4

6. Data Outputs & Reporting

6.1. Treatment of responses to open ended / other specify questions

To maintain comparability over time, considerable effort was made to keep coding rules and code-frames consistent with those used in earlier surveys for the limited number of questions where this was required.

Back coding to DEM7, DEM10, DEM11, DEM15, DEM17n, DEM18, DEM22 and RR1 was conducted by the Social Research Centre. Upon reviewing the modified election question at DEM22 it was decided that a code frame extension would be applied to identify votes for some minor parties.

6.2. Weighting

The use of dual-frame sampling required a two stage procedure for weighting the survey data. This involved calculating:

- a design weight to adjust for the varying chances of selection of sample members
- a post-stratification weight used to align the data with known population parameters.

Design Weight

The approach adopted for calculating the design weight is based on work of Jonathan Best[3]. In addition to typical adjustments relating to the number of in-scope persons in each household and the number of fixed-line telephone connections per household, this approach also determines a pre-weight to adjust for the overlapping chances of selection for persons who have both a mobile phone and a fixed-line telephone connection.

For members of the landline sample frame, the design weight adjusts each respondent's probability of selection according to the number of landlines and the number of resident in-scope persons for each household. For the mobile phone sample, each respondent's probability of selection was calculated based on the number of 'mobile phone' interviews in the final sample and the number of mobile phone owners in Australia.

These two design weights (that is, the separate design weights for members of the landline and mobile phone samples) were combined to create a pre-weight which was applied to each survey respondent.

Post-stratification weighting

As in previous surveys, a "rim weighting" procedure was used to benchmark the combined landline and mobile data against the Australian population. This second weighting stage was necessary to adjust for differential survey response rates across age, gender, educational attainment and country of birth and, where necessary, to also adjust for disproportionate aspects of the sample design (i.e. disproportionate geographic distribution between states).

[3] Jonathon Best, First-Stage Weights for Overlapping Dual Frame Telephone Surveys. Presented at AAPOR's 65th Annual Conference, Chicago, IL May 15, 2010

Population targets were taken from Australian Bureau of Statistics (ABS) December 2014 Estimated Residential Population (ERP) counts and from the 2011 Census[4] with the following simultaneous constraints applied during the rim weighting procedure:

- geographic location
- gender
- age by education
- country of birth.

The dual-frame approach required a further constraint being applied to the rim weighting process; each respondent's telephone status defined as "dual user" (i.e. both landline and mobile phone), landline only or mobile phone only.

The algorithm provided in the Social Research Centre's Quantum analysis software was used to carry out the rim weighting and develop the final sample weights. These weights were applied to all data prior to reporting and have been included in the electronic data files provided as outputs from the survey.

Appendix 1 provides the target population matrices used for weighting purposes in the 2016 survey.

6.3. Data file provision

The Social Research Centre provided two clean SPSS data files – one containing the 2016 data and a time-series file containing selected data from the seven surveys conducted since 2007. The data files included several derived variables including:

- ASGS – postcode data in concordance with the Australian Statistical Geography Standard published by the ABS;
- SEIFA – postcode data in concordance with the index of relative socio-economic disadvantage, created from ABS census data; and
- An exploratory diversity score which is the proportion of people resident in each postcode who were born either in Australia or overseas in an English speaking country; lower scores on this measure are indicative of greater cultural diversity. The formula used to calculate the diversity score for each postcode was [1 - (number of residents born overseas in a non-English speaking country ÷ total number of residents)][5].

[4] 2011 Census counts provide the most recent educational attainment and country of birth information.

[5] For consistency with earlier development work on this index, the diversity scores included in the data file are based on 2011 Census counts.

Appendix 1 Weighting Matrices

Rim weighting target matrix based on ABS 2015 Estimated Residential Population (ERP) and 2011 Census counts

Total aged 18 years and over	100.0%

INTRODUCTION

*MOBILE SAMPLE
IntroMob Good morning/afternoon/evening. My name is (…) and I am calling on behalf of Monash University from the Social Research Centre.

We're conducting an important study on the attitudes of Australians aged 18 and over to gain a better understanding of life in Australia. Would you be willing to do the survey at this time?

INTERVIEWER NOTE: PLEASE ENSURE RESPONDENT IS 18 YEARS AND OVER

1. Continue (GO TO MOB_APPT_A)
2. Appointment (GO TO MOB_APPT_A)
3. Refusal (GO TO RR1)
4. Queried about how number was obtained (GO TO PTEL_MOB)
5. Queried about why mobile was called (GO TO PINFO_MOB)
6. HH LOTE - Cantonese, Mandarin, Vietnamese, Italian, Greek, Arabic, Lebanese, Turkish (language follow up) (GO TO PREMOBLOTE)
7. HH LOTE – Other language identified (no language follow up) (COLLECT LANGUAGE & GO TO TERM3)
8. HH LOTE – Language not identified (make appointment) (MAKE APPOINTMENT)
9. Respondent under 18 (GO TO TERM1)
10. Go to SMS

*(QUERIED HOW MOBILE NUMBER WAS OBTAINED)
PTEL_MOB Your mobile number was randomly generated by computer. We're calling on mobile phones as well as landlines so we can get a representative sample of people across Australia.

1. Snap back to previous question

*(QUERIED WHY MOBILE WAS CALLED)

PINFO_MOB One of the issues currently facing telephone survey researchers in Australia is the increasing proportion of households without a landline telephone. We are calling mobile phones as well as landlines so we can get a representative sample of people across Australia.

1. Snap back to previous question

*LANDLINE SAMPLE

Intro Good morning/afternoon/evening. My name is (…) and I am calling on behalf of Monash University from the Social Research Centre.

We're conducting an important study on the attitudes of Australians to gain a better understanding of life in Australia.

1 Continue
2 HH LOTE - Cantonese, Mandarin, Vietnamese, Italian, Greek, Arabic, Lebanese, Turkish (language follow up) (GO TO LOTE)
3 HH LOTE – Other language identified (no language follow up) (RECORD ON SMS)
4 HH LOTE – Language not identified (make appointment) (RECORD ON SMS)

S1 You might have recently received a letter from Monash University about the study. To help with this important study we'd like to arrange a short interview with the person aged 18 or over who is going to have the next birthday.

May I speak to that person please?

1. Start survey (GO TO S2)
2. Stop interview, make appointment (RECORD NAME AND ARRANGE CALL BACK)
3. Household refusal (ATTEMPT CONVERSION / RECORD REASON) (GO TO RR1)
4. HH LOTE - Cantonese, Mandarin, Vietnamese, Italian, Greek, Arabic, Lebanese, Turkish (language follow up) (GO TO LOTE)
5. HH LOTE – Other language identified (no language follow up) (COLLECT LANGUAGE & GO TO TERM3)
6. HH LOTE – Language not identified (MAKE APPOINTMENT)
7. Queried about how telephone number was obtained (DISPLAY ATELQ)
8. No one in household over 18 (TERM1)
9. Wants a copy of the letter (ALET)
10. Return to SMS

*(SELECTED RESPONDENT)

S2 REINTRODUCE AS NECESSARY

This interview should only take about 15 minutes and all information you give us will be strictly confidential. Participation in this study is voluntary and you can stop the interview at any time. If you have any concerns I can give you the ethics approval number and the contact details of the researcher at Monash University.

Is it convenient to talk now or would you like to make an appointment?

1. Continue (GO TO S3)
2. Appointment (MAKE APPOINTMENT)
3. Respondent Refusal (GO TO RR1)
4. Wants contact / ethics details (GO TO CONTACT)

5. QR LOTE - Cantonese, Mandarin, Vietnamese, Italian, Greek, Arabic, Lebanese, Turkish (language follow up) (GO TO LOTE)
6. QR LOTE – Other language identified (no language follow up) (COLLECT LANGUAGE & GO TO TERM3)
7. QR LOTE – Language not identified (MAKE APPOINTMENT)
8. Queried about how telephone number was obtained (DISPLAY ATELQ)
9. Wants a copy of the introductory letter (ALET)

*(LOTES)
LOTE RECORD LANGUAGE

1. Cantonese
2. Mandarin
3. Vietnamese
4. Italian
5. Greek
6. Arabic
7. Lebanese
8. Turkish

*(ANSWERING MACHINE SCRIPT – FOR BOTH LANDLINE AND MOBILE SAMPLE)
ANSM1. Good morning/afternoon/evening. My name is <…> calling on behalf of Monash University researchers from the Social Research Centre.
We are telephoning across Australia to conduct an important study about life in Australia.
If you would like to participate in this study, please call our hotline number: 1800 023 040 and we will call you back at a time that is convenient to you. Thank you."
*PROGRAMMER NOTE: SET AS APPOINTMENT FOR TIME OF CALL PLUS 5 DAYS PLUS OR MINUS 2 HOURS

*(ANSWERING MACHINE SCRIPT)
ANSM2. Good morning/afternoon/evening. My name is <…> calling on behalf of Monash University researchers from the Social Research Centre.
We left a message recently on your answering machine regarding an important study about life in Australia.
If you would like to participate in this study, please call our hotline number: 1800 023 040 and we will call you back at a time that is convenient to you. Thank you."
*PROGRAMMER NOTE: SET AS APPOINTMENT FOR TIME OF CALL PLUS 6 DAYS PLUS OR MINUS 2 HOURS

*(QUERIED HOW TELEPHONE NUMBER WAS OBTAINED)
ATELQ Your telephone number has been chosen at random from all possible telephone numbers in your area. We find that this is the best way to obtain a representative sample of all Australians for our study.

*(WANTS TO RECEIVE A COPY OF THE LETTER)
ALET RECORD ADDRESS DETAILS TO SEND COPY OF LETTER

(RECORD NAME AND VERIFY ADDRESS DETAILS FROM SAMPLE / COLLECT ADDRESS DETAILS)

*PROGRAMMER NOTE RE ALET: WILL NEED TO BE ABLE TO TRACK INTERVIEWS RESULTING FROM SENDING A COPY OF THE LETTER]

*(ALL)
S3 This call will be recorded for training and quality purposes. Is that OK?

1 Monitor
2 Do not monitor

*PROGRAMMER NOTE: PLEASE SHOW THE OUTCOME OF THIS ON SCREEN

*(TIMESTAMP1)

*(ALL)
DEM18 Just before we continue, can you please tell me your postcode?

INTERVIEWER NOTE: IF ASKED WHY WE NEED POSTCODE – WE NEED YOUR POSTCODE TO MAKE SURE WE INTERVIEW ENOUGH PEOPLE IN EACH AREA

3 (Neither agree nor disagree)
4 Disagree
5 Strongly disagree
6 (Don't know)
7 (Refused)

*(ALL)
C1. Now some questions about immigration. What do you think of the number of immigrants accepted into Australia at present? Would you say it is …

(READ OUT)

1 Too high
2 About right, or
3 Too low
4 (No opinion/ don't know)
5 (Refused)

*(ALL)
CN1B Next I would like to ask how you feel about different types of people coming to live in Australia as permanent or long-term residents. Do you approve or disapprove of…

PROGRAMMER NOTE: Keep in the indicated order - do not randomise the TYPES OF PEOPLE

(PROBE: Is that strongly or somewhat approve / disapprove?)
(WHEN MOVING TO NEXT TYPE OF PEOPLE: And how do you feel about…)

TYPES OF PEOPLE
a) Skilled workers
b) Those who have close family living in Australia (i.e. partners or children of Australian residents)
c) Asylum seekers who try to reach Australia by boat
d) Refugees who have been assessed overseas and found to be victims of persecution and in need of help

(RESPONSE FRAME) (READ OUT AS REQUIRED)

1. Strongly approve
2. Somewhat approve
3. (Neither approve nor disapprove)
4. Somewhat disapprove
5. Strongly disapprove
6. (Don't know)
7. (Refused)

*(ALL)
C2. Do you agree or disagree with the following statements…

(PROBE: Is that agree or strongly agree / disagree or strongly disagree?)

(STATEMENTS)
a) Accepting immigrants from many different countries makes Australia stronger
b) Ethnic minorities in Australia SHOULD be given Australian government assistance to maintain their customs and traditions
c) Multiculturalism has been good for Australia

(RESPONSE FRAME)
1 Strongly agree
2 Agree
3 (Neither agree or disagree)
4 Disagree
5 Strongly disagree
6 (None of the above/ Don't know)
7 (Refused)

*(ALL)
C10 Do you agree or disagree with the following statements about ethnic and cultural groups in Australia?

(PROBE: Is that agree or strongly agree / disagree or strongly disagree?)

(STATEMENTS)

a) We should do more to learn about the customs and heritage of different ethnic and cultural groups in this country
b) It is best for Australia if all people forget their different ethnic and cultural backgrounds as soon as possible
c) People who come to Australia should change their behavior to be more like Australians

(RESPONSE FRAME)

1. Strongly agree
2. Agree
3. (Neither agree nor disagree)
4. Disagree
5. Strongly disagree
6. (Don't know)
7. (Refused)

*(ALL)
CN7intro. Next, I would like to ask you about your attitude towards different religious groups.

PROGRAMMER NOTE: FOR CN7 SHOW FIRST PART OF QUESTION STEM FOR FIRST STAMENT, THEN SECOND PART FOR REMAINING STATEMENTS

CN7. Is your personal attitude positive, negative, or neutral towards [STATEMENT]? / And what about [STATEMENT]…

(PROBE: Is that very or somewhat positive/ negative?)

(STATEMENTS)

a) Christians
b) Buddhists
c) Muslims

(RESPONSE FRAME)

1 Very positive
2 Somewhat positive
3 Neutral
4 Somewhat negative
5 Very negative
6 (Don't know)
7 (Refused)

*(ALL)

CN4intro Next I would like to ask about your attitude to refugees. The government has announced that as part of its Humanitarian program it will resettle refugees from the Syrian conflict in Australia.

*(ALL)
CN8 Do you support or oppose the government's plan to bring refugees from the Syrian conflict to Australia?

(PROBE: Is that strongly support or support/ strongly oppose or oppose?)

(RESPONSE FRAME)

1. Strongly support
2. Support
3. (Neither support nor oppose)
4. Oppose
5. Strongly oppose
6. (Don't know)
7. (Refused)

*(ALL)
CN9 When deciding which refugees from the Syrian conflict Australia should accept, would you prefer equal consideration be given to all religious and ethnic groups, or should priority be given to Christians?

(RESPONSE FRAME)

1. Preference for equal consideration to all religious and ethnic groups
2. No opinion
3. Preference for priority for Christians
4. (Does not approve of any Syrian refugee intake)
5. (Don't know)
6. (Refused)

*(ALL)
CN10 If some of these refugees from the Syrian conflict came to live in your community, do you think they would be welcomed, or not?

(PROBE: Do you think they would be made very welcome or welcome / not welcome or not at all welcome?)

(RESPONSE FRAME)

1. Very welcome
2. Welcome
3. Neither welcome nor not welcome
4. Not welcome
5. Not at all welcome
6. (Don't know)
7. (Refused)

*(ALL)

CN11 Do you think that Australia's current refugee intake is adequate, too few or too many?

(PROBE: Is that much too few or too few / too many or much too many?)

(RESPONSE FRAME)

1. Much too few
2. Too few
3. Adequate
4. Too many
5. Much too many
6. (Don't know)
7. (Refused)

*(ALL)

CN12 Overall, do you think the Government is doing a good job, an average job or a poor job in handling the refugee issue?

(PROBE: Is that a very good job or good job/ poor job or very poor job?)

(RESPONSE FRAME)

1. A very good job
2. A good job
3. An average job
4. A poor job
5. A very poor job
6. (Don't know)
7. (Refused)

*(TIMESTAMP4)

MODULE D: DISCRIMINATION

*(ALL)
Intro: Now thinking about any discrimination you may have personally experienced.

*(ALL)
D5. Have you experienced discrimination because of your skin colour, ethnic origin or religion over the last 12 months?

1. Yes
2. No
3. (Refused)

*(HAS EXPERIENCED DISCRIMINATION, D5=1)
D6. How often did you experience discrimination? Was it

1 Often – most weeks in the last year
2 About once a month in the last year
3 Three to six times in the last year
4 Just once in the last year
5 (Don't know)
6 (Refused)

*(HAS EXPERIENCED DISCRIMINATION, D5=1)
D7c What form did the discrimination take? Please tell me if any of these apply?

1. I was made to feel like I did not belong
2. I was verbally abused.
3. I was not offered a job.
4. I was not promoted or treated fairly at work.
5. My property was damaged.
6. I was physically attacked.
7. (None of these apply)
8. (Don't know)
9. (Refused)

*(TIMESTAMP5)

MODULE E: REFLECTIVE

*(ALL)

Intro: Next I'd like to ask your opinion on some more general issues.

E1. Generally speaking, would you say that most people can be trusted or that you can't be too careful in dealing with people?

(PROBE IF NECESSARY: Is that can be trusted / can't be too careful?)

1 Can be trusted
2 Can't be too careful
3 (Can't choose/Don't know)
4 (Refused)

*(ALL)
E2. Taking ALL things into consideration, would you say that over the last year YOU have been …

(READ OUT)

1 Very happy
2 Happy
3 (Neither happy nor unhappy)
4 Unhappy, or
5 Very unhappy
6 (Don't know)
7 (Refused)

*(ALL)
E3. In three or four years, do you think that your life in Australia will be

(READ OUT)

1 Much improved
2 A little improved
3 The same as now
4 A little worse, or
5 Much worse
6 (Don't think will be living in Australia)
7 (Cannot predict / Don't know)
8 (Refused)

*(TIMESTAMP6)

MODULE F: NEIGHBOURHOOD AND VOLUNTARY WORK

Intro: And now thinking about your local area that is within 15 to 20 minutes walking distance of where you live

*(ALL)

PROGRAMMER NOTE: ONLY SHOW CODE 6 FOR STATEMENT B

F2 Do you agree or disagree with the following statements …

(PROBE: Is that agree or strongly agree / disagree or strongly disagree?)

[INTERVIEWER NOTE: IF NECESSARY REMIND RESPONDENT THAT "your local area is within 15 to 20 minutes walking distance of where you live"]

(READ OUT)

(STATEMENTS)
a) People in my local area are willing to help their neighbours?
b) My local area is a place where people from different national or ethnic backgrounds get on well together
c) The mix of different national or ethnic backgrounds improves local life
d) I am able to have a real say on issues that are important to me in my local area.

(RESPONSE FRAME)

1. Strongly agree
2. Agree
3. (Neither agree nor disagree)
4. Disagree
5. Strongly disagree
6. (There are not enough immigrants in my neighborhood to have any impact)
7. (Don't know)
8. (Refused)

(ALL)
F7. Would you say that living in your local area is becoming better or worse, or is it unchanged?

(PROBE: Is that better or much better / worse or much worse?)

1. Much better
2. Better
3. Unchanged
4. Worse
5. Much worse
6. (Don't know)
7. (Refused)

*(ALL)
B1 The next two questions are about unpaid voluntary work. By this I mean any unpaid help you give to the community in which you live, or to an organisation or group to which you belong.

It could be to a school, a sporting club, the elderly, a religious group or people who have recently arrived to settle in Australia.

Have you done any unpaid voluntary work of this kind in the last 12 months?

1 Yes
2 No
3 (Don't know)
4 (Refused)

*(UNDERTAKES VOLUNTEER WORK) (B1=1)
B2 How often do you participate in this sort of voluntary activity? Is it…

(READ OUT)

1 At least once a week
2 At least once a month
3 Three to four times a year
4 At least once a year
5 Less often than once a year
6 (Don't know)
7 (Refused)

*(ALL)
F9b intro And now turning to another issue, your sense of personal safety.

F9b How safe do you feel walking alone at night in your local area? Would you say you feel …

(READ OUT)

1. Very safe
2. Fairly safe
3. A bit unsafe: or
4. Very unsafe
5. (Neither safe nor unsafe)
6. (Never walk alone at night)
7. (Don't know)
8. (Refused)

*(ALL)
F10. Thinking about all types of crime in general, how worried are you about becoming a victim of crime in your local area? Would you say you are …

(READ OUT)

1. Very worried
2. Fairly worried
3. Not very worried
4. Not at all worried
5. (Don't know)
6. (Refused)

*(TIMESTAMP7)

DEMOGRAPHIC INFORMATION

Social Cohesion Survey 2016
National & Local level

A Research Project for:

Monash University

Agenda

- Project background
- Detailed questionnaire run-through
- Practice interviewing
- Interviewing
- End of shift review

Social Research Centre
An ANU Enterprise business

Project background

- The Scanlon Foundation started the Social Cohesion Research Program (SCRP) in 2007. The Social Cohesion Survey forms a part of this multi stage research program. Scanlon fund the survey.
- This survey has been conducted by SRC since 2007 (2007, 2009 - 2015)
- Many of the questions are retained from previous waves.
- The survey is directed by Monash University and the Australian Multicultural Foundation (AMF).

Social Research Centre
An ANU Enterprise business

More about the stakeholders

- The immediate client for us and respondents is Monash University
- The School of International, Historical and Philosophical Studies is the faculty within Monash University conducting the research.
- Professor Andrew Markus is the lead researcher of the project at Monash University
- The reports from the research are publicly accessible on their website which is listed in the survey
  - http://www.arts.monash.edu.au/mapping-population/

Social Research Centre
An ANU Enterprise business

Stakeholders (cont.)

- The Scanlon Foundation was established in 2001
- Their mission is to support 'the advance of Australia as a welcoming, prosperous and cohesive nation'
- Primarily interested in cultural diversity and social cohesion
- Provides substantial funding grants for further research into these two areas
- Driven by the principle that maintaining social cohesion is fundamental to the future prosperity of Australia

Social Research Centre
An ANU Enterprise business

Project Overview – National Survey

- National survey is our standard survey conducted each year. The National project job number **1728**
  - Slow start 11th July
  - Main field work period 11th July –8th August
  - 1,500 interviews across Australia – Dual Frame
    - 900 Landline surveys
    - 600 Mobile surveys
  - 30% of landlines have been sent a primary approach letter
  - All mobiles will receive a pre-notification text message
  - All sample is RDD (landline and mobile)

Social Research Centre
An ANU Enterprise business

Project Overview – Local Survey

- The Local level project has only been conducted a few times over the past 9 years. This will be the first time in since 2013. The Local project number is **1729**
- Three local regions have been selected for this research
  - Wollongong (n=300)
  - Toowoomba (n=300)
  - Hobart (n=300)
- No pre-approach material has been sent (no PAL or SMS)
- This project will run at the same time as National. *Check your roster carefully as to which project you have been assigned to each shift*

Social Research Centre
An ANU Enterprise business

Project Overview – Local Survey

- To be able to interview in these specific localities a different sampling approach has to be used.
- All numbers for this *local* project (landline or mobile) have been randomly selected from a list of numbers that are thought to be in that region.
- This is to improve efficiency as using pure RDD sample for such specific regions would cost an extreme amount of money and take a very long time.
- Respondents are only in-scope if they reside in a postcode attributed to that location.

THE SURVEY CONTENT IS EXACTLY THE SAME BETWEEN NATIONAL AND LOCAL

Social Research Centre
An ANU Enterprise business

Survey overview

- **Target surveys:** 1,500 NATIONAL / 900 LOCAL
- **Expected average interview length:** 16 minutes
- **Main Fieldwork:** 11th July to 7th August
- **PAL's sent**: 30% of National LandLine ONLY
- **LOTEs: National ONLY (no lotes for local)**

Social Research Centre
An ANU Enterprise business

Survey overview

- Covers varying topics from immigration to politics with a particular focus on multiculturalism
- Expect to hear many different, even diametrically opposed, viewpoints
- Expect that some responses may come across as offensive or alien to your point of view. *Critical to remain neutral at all times.*
- Gentle call control important for chatty respondents, especially when the topics are sensitive and close to the heart of the respondent

Social Research Centre
An ANU Enterprise business

Survey Overview (cont.)

- Primary approach letter was sent to respondents for the main survey where we have an address.
- First letters were sent on Monday 4th July and each batch is sent weekly after that.
- Numbers have been sourced from all possible available phone numbers within the area (randomly selected or RDD).

Social Research Centre
An ANU Enterprise business

Survey Overview (cont.)

- Landlines
  - Respondent selected using the "next birthday" method
  - May need to explain that in order to achieve a representative sample we can **only** interview the randomly selected person in the household.
- Mobiles
  - Phone owner is the qualifying respondent (if aged 18 or over!)
  - Make sure to screen for state before making an appointment so that we have the correct time zone when calling back

Social Research Centre
An ANU Enterprise business

Call procedures

- Calls will only be initiated between 4:30 pm and 8:30 pm weekdays and 11:00 am and 5:00 pm on Saturdays and on Sundays
- Appointments can be made for any time the call centre is operational
- Day time appointments should generally only be made if:
  - The QR requests a daytime appointment
  - Someone in the household has said daytimes are likely to be good to catch the QR

Social Research Centre
An ANU Enterprise business

Non-English speaking respondents

- For the National survey we will be interviewing in Cantonese, Mandarin, Vietnamese, Italian, Greek, Arabic, Lebanese and Turkish.
- Record LOTEs using the standard SRC codes:
  - HH LOTE - Cantonese, Mandarin, Vietnamese, Italian, Greek, Arabic, Lebanese, Turkish (language follow up).
  - HH LOTE – Other language identified (no language follow up)
  - HH LOTE – Language not identified (make appointment)
- If you are unable to establish the language spoken make an appointment for two days time (plus or minus two hours)
  - A good way to establish the language is simply to suggest a language you think they might be speaking.
- We only need to make a couple of attempts to establish the language
  - On the second unsuccessful attempt you can code away as 'Unable to establish language'.

Social Research Centre
An ANU Enterprise business

Survey Administration

- We will be leaving automated answering machine messages on both landlines and mobiles
  - Up to two messages on landlines (No more!)
  - Only one message on mobiles
- Only leave a message if we have:
  - NOT had contact with anyone in the household or on the mobile phone.

REMEMBER – **YOU MIC IS STILL LIVE WHILE THE MESSAGE IS PLAYING!**

Social Research Centre
An ANU Enterprise business

Survey Administration

- Refusals recorded "internally" (not at SMS screen)
- Differentiate between household and respondent refusals
- Differentiate between "hard" and "soft" refusals
  - 1. Definitely do not call back
  - 2. Possible conversion
- Expected to get a minimum of 50% response rate so important to work on refusal aversion strategies (no more than one refusal for every completed interview).
- We will be conducting refusal conversion

Social Research Centre
An ANU Enterprise business

Privacy and confidentiality

- Our contract with the Monash University explicitly prohibits us from passing on information to a third party
- Details kept strictly confidential and used for research purposes only
- Data analyzed at an aggregated (not individual) level
- Bound by the provisions of the Commonwealth Privacy Act and Australian Market and Social Research Society's Code of Professional Behavior

Social Research Centre
An ANU Enterprise business

Respondent queries

- All initial queries directed to the SRC helpdesk – 1800 023 040
- Monash University - Information on why the study is being conducted:
  - Dr Margaret Taft
  - Tel: 03 9903 5018
  - margaret.taft@monash.edu
- Complaints
  - Human Ethics Officer
  - Tel: 03 9905 2052
  - muhrec@monash.edu

Social Research Centre
An ANU Enterprise business

Survey Content - Introductions

- The first question in the survey is an unprompted "what do you think is the most important problem facing Australia today?"
- It is essential that you do not give away any information that might bias the QRs response to this question.
- Make sure that your introductions use general information only and make no mention of topics
- Use terms like "community issues" or "issues facing Australia" not specific terms like "immigration" or "population issues".
- If someone asks you what issues the survey is about, you can let them know you can't reveal anything more about the study due to the first question – even use this as a 'hook' to try to get them intrigued about the study

Social Research Centre
An ANU Enterprise business

Survey Content – AN1 (first question)

Most important problem facing Australia today…

- This a single coded and unprompted question
- Please avoid using 'Other' unless absolutely necessary, as **it is not a 'specify'**
- Please consult your supervisor if you come across a response you are not sure about
- The question has *positive* and *negative* dimensions for 3 topics: asylum seekers, immigration and environment
  - Asylum seekers (sympathetic comment) / Asylum seekers (negative comment)
  - Environment (concern) / Environment (sceptical)
  - Immigration/Population (negative) / Immigration/Population (supportive)
- Probe out any ambiguous answers in a neutral manner e.g. "Can you tell me a bit more about that?"

Social Research Centre
An ANU Enterprise business

Data quality issues

- Take care to record all numeric responses accurately
  - Postcode, number of residential phone numbers
- Accurate probing of scale question
  - Scales must be read out as presented
  - As always, your best efforts are appreciated!

Social Cohesion Research Project – National Survey

Dear Householder,

My name is Andrew Markus and I am a professor in the Faculty of Arts at Monash University. I am writing to ask for your help with an important Australian study being undertaken by researchers at Monash University. This project aims to obtain people's **views on Australian society and its future, with a focus on social cohesion and population issues.**

Details of the project may be accessed at http://monash.edu/mapping-population/

Why were you chosen to participate?
Monash University has contracted the *Social Research Centre* to conduct the telephone interviews required for this study. Your household has been selected on a random basis to take part, along with many others across Australia. Any information provided will be treated in the strictest confidence by *The Social Research Centre*. Monash University will not receive any information from the survey that could identify you or your household.

Possible benefits
This project will provide government and the Australian public with information on social cohesion and population issues in Australian society. In doing so the project will make an important contribution to public discussion and planning.

What does the research involve?
The study involves your response over the telephone to a set of questions.

How much time will the research take?
The questionnaire will take approximately 15 minutes of your time.

Inconvenience/discomfort
The survey will not intrude into your privacy: you may decide not to answer some of the questions.

Payment
There is no payment for participation.

Can I withdraw from the research?
Participation is entirely voluntary. If you do agree to participate, you may withdraw at any time.

Confidentiality
Your responses to the survey questions will be entirely anonymous.

Storage of data
Storage of the data will be undertaken under University regulations. The anonymous responses will be kept on secure computers on University premises for a minimum of five years.

Use of data for other purposes
Data resulting from the survey will be reported nationally and will be accessible to researchers.

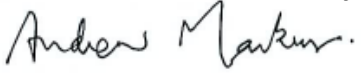

Results

Once the project is completed the key findings will be accessible for a minimum of five years on the project website. The results of the 2015 survey are at http://monash.edu/mapping-population/

Further questions
If you have any questions about your participation in the survey or would like to make a time for an interviewer to call you, please call *The Social Research Centre* on 1800 023 040 (a free call).

If you would like to contact the **researchers** about any other aspect of this study, please contact Dr Margaret Taft	If you have a **complaint** concerning the manner in which this research project (CF07/1240) is being conducted, please contact:
Dr Margaret Taft, School of International, Historical and Philosophical Studies, Faculty of Arts, Monash University, Clayton, Victoria 3800 Tel: 03 9903 5018 Email margaret.taft@monash.edu	Human Ethics Officer, Monash Research Office, Building 3E, Room 111, Monash University, Clayton VIC 3800 Tel: 03 9905 2052 Email: muhrec@monash.edu

Thank you in anticipation of your voluntary co-operation in this important survey. Your views are valuable and important in helping us understand Australian society and its future development.

Professor Andrew Markus

社会凝聚力研究项目

我叫Andrew Markus，是蒙纳士大学历史研究系的教授。给您写信，目的是请求您配合蒙纳士大学开展澳大利亚的一项重要研究项目。本次研究内容涉及澳大利亚的各类社会事务。

蒙纳士大学委托社会研究中心开展本次研究所需的电话采访工作。我们随机抽选了您的家庭和澳大利亚境内众多家庭一同参加。您所提供的全部资料都将得到社会研究中心最严格的保密。蒙纳士大学不会得到本次调查中任何可能泄露您或您家庭身份的信息。

本次问卷调查约需15分钟，是否参加完全自愿；若同意参加，您也可以随时退出。您的回答将完全匿名。

在此预先感谢您在这项重要调查中的配合。您的观点非常宝贵和重要。

مشروع بحث خاص بالتماسك الاجتماعي

إسمي أندرو ماركوس، بروفسور في دائرة الدراسات التاريخية بجامعة موناش. أكتب إليك طالبًا مساعدتك في دراسة أسترالية هامة تقوم بها جامعة موناش. تتناول هذه الدراسة مجموعة من القضايا الاجتماعية في أستراليا.

وقد تعاقدت جامعة موناش مع مركز *البحوث الاجتماعية* لإجراء المقابلات الهاتفية اللازمة لهذه الدراسة. وقد اختيرت أسرتك على أساس عشوائي للمشاركة مع كثير من الأشخاص الآخرين في أنحاء أستراليا. سيعامل مركز *البحوث الاجتماعية* أية معلومات تقدمها بأعلى مستوى من السريّة. ولن تتلقّى جامعة موناش أية معلومات من الاستطلاع يمكن أن تشير إلى هويتك أو هوية أسرتك.

سيستغرق الاستبيان حوالي 15 دقيقة من وقتك. والمشاركة طوعية تمامًا. وإذا وافقت على المشاركة، فإنه يجوز لك أن تنسحب في أي وقت. ولن تبيّن الإجابات التي تعطيها أية معلومات تشير إلى هويتك على الإطلاق.

شكرًا سلفًا لتعاونك الطوعي في هذا الاستطلاع الهام. إن آراءك قيّمة وهامة.

Sosyal Uyum Araştırma Projesi

Adım Andrew Markus ve Monash Üniversitesi Tarihsel Araştırmalar Bölümü'nde profesör olarak görev yapıyorum. Bu yazıyı size, Monash Üniversitesi tarafından yürütülmekte olan önemli bir Avustralya araştırması ile ilgili olarak sizden yardım talep etmek amacıyla yazıyorum. Bu çalışma, Avustralya'daki bir dizi sosyal konular üzerinde durmaktadır.

Monash Üniversitesi araştırma için gerekli olan telefon mülakatlarını yürütmesi için *Social Research Centre (Sosyal Araştırmalar Merkezi)* ile anlaşmış bulunmaktadır. Hanenizde yaşayan kimseler, Avustralya çapındaki çoğu kimseler gibi şansa bağlı olarak seçilmiş bulunmaktadır. Sağlanan bilgiler *Social Research Centre* tarafından tamamen gizli tutulacaktır. Monash Üniversitesi yapılan anketle sizin veya hanenizdeki bireylerin kimliğini açığa vuracak herhangi bir bilgi elde etmeyecektir.

Bu anket yaklaşık olarak 15 dakika zamanınızı alacaktır ve katılıp katılmamak tamamen isteğe bağlıdır. Eğer katılmaya karar vermişseniz, bu kararınızı istediğiniz zaman geri çekebilirsiniz. Verdiğiniz cevaplarlar tamamen isimsiz kalacaktır.

Bu önemli araştırmaya gönüllü olarak katıldığınız için şimdiden teşekkür ederim. Görüşleriniz bizim için değerli ve önemlidir.

Dự án Nghiên cứu về Gắn bó Xã hội

Tên tôi là Andrew Markus. Tôi là giáo sư giảng dạy tại Khoa Sử học, Trường Đại học Monash. Tôi viết thư này mong được sự giúp đỡ của quý vị cho một chương trình nghiên cứu quan trọng của Trường Đại học Monash. Công trình nghiên cứu này sẽ xem xét nhiều vấn đề xã hội ở Úc.

Trường Đại học Monash đã ký hợp đồng giao cho *Viện Nghiên cứu Xã hội* tiến hành các cuộc phỏng vấn qua điện thoại cần thiết cho Nghiên cứu này. Tình cờ gia đình của quý vị đã được chọn tham gia Dự án, cũng như nhiều gia đình khác trên khắp nước Úc. Mọi thông tin thu thập sẽ được *Viện Nghiên cứu Xã hội* bảo mật tuyệt đối. Trường Đại học Monash sẽ không nhận được bất kỳ thông tin nào từ cuộc khảo sát này, mà qua đó có thể xác định được danh tính hay gia đình của quý vị.

Quý vị sẽ mất khoảng 15 phút để trả lời các câu hỏi. Việc tham gia này là hoàn toàn tự nguyện. Ngay cả khi quý vị đồng ý tham gia, quý vị cũng có thể xin rút bất kỳ lúc nào. Những câu trả lời của quý vị sẽ được dấu tên hoàn toàn.

Chúng tôi xin cảm ơn nếu được quý vị vui lòng tự nguyện hợp tác với chúng tôi trong cuộc khảo sát quan trọng này. Ý kiến của quý vị sẽ rất giá trị và quan trọng cho dự án của chúng tôi.
